## PROFILE

Innovative Programmer striving to make the world a more unified and connected place. A creative thinker, adept in software development and working with various data structures.

## EDUCATION

**BA Physics , University of California, Berkeley**

Aug 2016 — May 2020

## PROJECTS

### Weather Dashboard

A website where a user can track the weather and obtain a current and 5 day forecast for a particular city. The website was created with HTML, CSS, and JavaScript.

The site can be found [here](#).

### Crime Watch

A website where a user can look up crimes for any US city and have them displayed on a map. The user can also filter by the crime type. The website was created with HTML, CSS, and JavaScript.

The site can be found [here](#).

### Password Generator

A password generator that creates a pseudo-random password for the user using their choice of character sets and length. The site uses JavaScript for its functionality with HTML and CSS for styling.

The site can be found [here](#).
